For details on travel and accommodation please see the website www.ecpts.de and the local Tourist Information www.papenburg-tourismus.de.

For special conditions at the Hotel Alte Werft please quote "4. ECPTS".

4. European Conference on Production Technologies in Shipbuilding Outfitting in Ship Production

April 29 - 30, 2010

Papenburg
Germany

Sponsors

www.ecpts.de

Outfitting in Ship Production

The competitiveness of the European ship-building industry is mainly influenced by the productivity of outfitting processes and the quality of equipment systems. For high-specialised ships like cruisers, ferries or product tankers these processes and systems represent about 70% of the total added value.

The close co-operation between shipbuilding suppliers and shipyards is therefore more and more important.

The Meyer Werft GmbH as one of the most successful shipyards for cruise liners worldwide will give a perfect background for the topics of this conference.

The ECPTS 2010 will focus on:

- Integration of outfitting and production processes
- Integration of equipment systems
- Optimisation of co-operation between supplier and shipyard (supply chain management)
- Modularisation of equipment systems

Who Should Attend?

Representatives from:

- Design and production departments of shipyards
- Engine and equipment manufacturers
- Service providers
- Classification societies
- Engineering offices
- Shipping companies
- Research institutes and universities

Subjects

- **Accommodation systems (cabins, public areas, superstructure)**
- **Automation, communication and navigation systems**
- **Ship systems, energy conversion and distribution, pipe and cable systems, HVAC, main propulsion and auxiliary systems, safety equipment**
- **Steering gears, towing winches, rudder, anchor/mooring winches etc.**

The Organizers of the ECPTS 2010

- **Center of Maritime Technologies (CMT),**
- **The German Society for Maritime Technology (STG),**
- **Department of Mechanical Engineering and Marine Technologies of the University of Rostock,**
- **IMAWIS GmbH,**
- **Association of German Engineers (VDI)**

welcome you to the conference which will feature an opening with keynotes from the management of the MEYER WERFT Papenburg.

The conference will attract a large international audience and provide a forum and means of professional development for all parties specially interested in ship outfitting systems.
